

Thorx Business & Product Knowledge Base

Founder Edition 2026 (Foundation v1)

Purpose

This document serves as the master knowledge base and single source of truth for Thorx. It documents the business model, product vision, platform architecture, operational strategy, and long-term roadmap.

Vision

Build an AI-powered digital engagement platform that connects businesses with verified human attention while enabling users to earn through meaningful online activities.

Mission

Provide transparent earning opportunities, high-quality advertiser outcomes, secure payments, and a trusted ecosystem.

Core Business Model

Thorx starts with rewarded advertising and curated CPA offers, then evolves toward a direct advertiser marketplace powered by proprietary quality and fraud-prevention systems.

Primary Users

Earners, Advertisers, and Internal Team.

Core Platforms

User Portal, Advertiser Portal, Team Portal, Admin Portal.

Core Engines

Attention Marketplace, Curated Reward Marketplace, Referral Growth Engine, LeadX Intelligence, Fraud Prevention Engine.

Revenue Strategy

Multiple revenue streams including rewarded ads, CPA offers, direct campaigns, sponsored placements, subscriptions (future), analytics, APIs, and white-label solutions.

Technology

Responsive web-first architecture using modern frontend, backend, secure authentication, scalable database, payment integrations, analytics, and AI-assisted moderation.

Roadmap

Phase 1 MVP; Phase 2 Growth; Phase 3 Advertiser Platform; Phase 4 Lead Marketplace; Phase 5 International Expansion.

Brand Positioning

Thorx should be positioned as an AI-powered Digital Engagement Platform rather than simply an earning website.

Next Expansion

Future editions will include complete business rules, database schema, UI specifications, SOPs, technical architecture, security, AI systems, and implementation details.
